

SHOOTBOLT EXTENSION FOR FRENCH CASEMENT WINDOWS

These products have been introduced to broaden the range of options available for users of MKI and Mach II Shootbolt espagnolettes. The centre units listed on pages C7 and C8 can be used in conjunction with the extensions listed below to provide a simple and secure solution.

Maco applies a triple stage environmentally friendly silver passivated finish. All products listed are approved to 360 hours corrosion resistance when tested in accordance with ISO9227:1990.
