D7 0907 Product by FUHR

EN1125 PANIC EXIT LOCK - 870 TYPE 8 SINGLE OR MASTER DOOR

Multisafe 870, the multipoint panic exit locking mechanism particularly suitable for exit doors with high traffic volume. From the inside the door can be opened at any time and used as an emergency exit should the need arise. From the outside the building is protected from unauthorised access. One piece 16mm wide steel flat faceplate silver bichromate finish 2170mm overall, enclosed 35mm backset, zinc plated lockcase to suit lever and profile cylinder, with latch, deadbolt and two round deadbolts. Follower 9mm, centres 92mm, Backset 35mm, Handle Height 1020mm.

- Multipoint locking system with Panic Exit function
- Reversible latch (non handed)
- Steel round deadbolts 20mm throw with lockout for strength and security
- High security panic door hardware for use on PVCu, Aluminium and Timber doors
- Internal operation via panic bar
- Panic bar finished in RAL9029 Green
- External access kit available
- Multipoint lock, panic bar and cylinder successfully tested and conform to EN1125
- Classification

3	7	6	0	1	3	2	2	A
---	---	---	---	---	---	---	---	---
- Single doors minimum rebate width 700mm, maximum rebate width 1200mm

IMPORTANT NOTE: Only use with CES 8710 Free Movement Cylinder

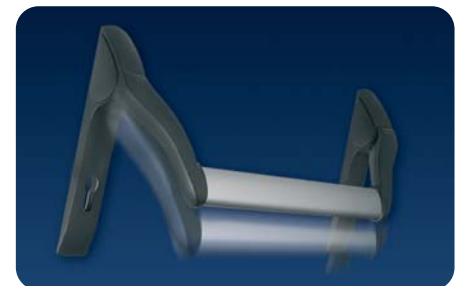

Operation:

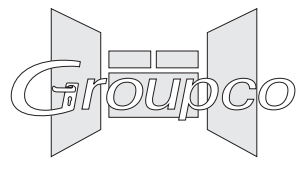

- Internal** Locking is achieved by a double turn of the key.
Unlocking is carried out by pushing the panic bar.
After a panic release the door can be locked once more by turning the key.
- External** Locking is achieved by a double turn of the key.
Unlocking and latch retraction by reversing the locking sequence.

To comply with EN1125 Certification only the products listed below can be used.
