DOOR BOLT PLATES

D28 0907 Product by FUHR

Profile related plates are available to suit a comprehensive range of PVCU profiles and timber.

The majority of the Combined centre latch/deadbolt, Hook bolt and Round deadbolt plates are designed to be fixed to the reinforcement in PVCU profiles together with an increasing number of other plates.

Finish: Steel and mazak products are silver bichromate finish with the inserts nickel plated.

1. Combined centre latch/deadbolt plate

Manufactured in steel with mazak **adjustable** latch insert, black PVC profile related end caps and deadbolt cover.

2. Roller plate

Manufactured in mazak with one or two screw fixing depending on the PVCU profile.

3. Mushroom plate

The majority are manufactured in either special steel alloy with PVC profile related underplate, or pressed steel, both providing effective jemmy protection.

4. High security hook bolt plate

Designed to achieve PAS 23/24 on suitable profile. The plate is manufactured in steel, with hardened metal **adjustable** hook bolt insert and black PVC profile related end caps.

5. Round deadbolt plate

Manufactured in steel with black PVC profile related end caps and deadbolt cover. Available with adjustable deadbolt insert to special order.

6. Top and bottom bolt plate

Manufactured in either special steel alloy for strength with mazak **adjustable** profile related underplate and black PVC bolt covers, or mazak **adjustable** with PVC profile related underplate.
